- Power Consumption < 0.8w (.05amps @13.5Vdc)

Zorg has been producing Vehicle Safety products since 1998. The flush mount series camera was released in 2017 for the Heavy Duty Camera Market. The standards have always included an all Aluminum housing, Heavy duty cable and connector, True IP69 Weather Proof and Shock Proof construction. We have continually met FMVSS 111 requirements and exceeded DOT requirements for commercial vehicle use as well as Upfitter Final Vehicle Certification. These reasons are why Zorg has been the choice ODM Manufacturer for many brands and resellers of safety products.

Since 2020 Zorg North America has been offering products direct to the UpFitter.
